

2<sup>nd</sup> International Conference on

# EMERGENCY MEDICINE AND CRITICAL CARE

October 02, 2020 | Virtual Conference

Temperature between 38 degrees and 41 degrees cannot be a symptom of any of the diseases.

A different cause of diseases like virus, bacteria, fungi, venom, horror scene, and horror dream never shows the same symptoms.

Fever has never been scientifically proved as a symptom of a disease. Fever has the properties of adaptation.

If we ask any type of question-related to fever by assuming that the fever is not a symptom we will get a clear answer. If we avoid or evade from this we will never get a proper answer to even a single question.

## **Biography:**

Yacob Mathai is a practicing physician in the field of healthcare in the state of Kerala in India for the last 30 years and very much interested in basic research. He has interests in spread across the fever, inflammation and back pain. He is a writer. he had already printed and published nine books on these subjects. He wrote hundreds of articles in various magazines.

After scientific studies, we have developed 8000 affirmative cross checking questions. It can explain all queries related to fever
